DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 9-20 in Paper No. 4 is acknowledged.

Claim Rejections - 35 USC § 103

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicants admitted prior art.

Claim 9, Applicants admitted prior art [figure 1 and the Background Section of the Specification] discloses a circuit breaker with a housing, a main stationary contact, a

main moveable contact, an operating mechanism, a line conductor, a load conductor, an electronic trip unit, a current sensor, an air-core sensor assembly and a mounting bracket with a unitary body having a generally U-shaped portion [5] and at least one retaining form [4] structured to fit over a fastener head.

Claim 11, at least one retaining form is arc extending [3, 4] with a top portion [3] coupled to the U-shaped portion and a bottom portion having a retaining lip [4] structured to fit under a fastener head.

Allowable Subject Matter

Claims 10 and 12-20 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
